**Subject:** IESI landfill

In accordance with commission rules, I am submitting a follow-up request to deny the expansion of the IESI Landfill on Dick Price Rd. Fort Worth, Tx., based on the effects on the air quality and pollution of our natural resources. Further studies need to be made to assure the surrounding environment will not be adversely affected. One of my concerns is the Southwest Nature Preserve. The response from the IESI lawyer stated that I would not be affected. He addresses that I did not include the correct distance from the IESI Landfill. I live at 5224 Saratoga Ln. In Arlington, TX, approximately 2.1 miles from the landfill in question. Response from IESI claims I didn't describe how I utilized the SW Nature Preserve. My property backs up to the preserve, as an artist, I hike in the preserve, getting inspiration for my artwork. The wildlife and flora creates a inspiring background for my artwork. My concern is that runoff could affect the environment of this SW Nature Preserve. Yes, there are 2 landfills nearby, adding more expansion to either one would only create more wastes that add to the detriment of the environment. Nobody wants a landfill in their backyard. I am asking the TCEQ to consider the requests to protect our environment from the ever growing mountains of solid wastes.
